EZCast

EZCast devices, in the forms of dongles or boxes, are the remote-free cross-platform (iOS, Android, Windows, Mac and Windows phone 8.1) wireless display products, which receive and display the contents you love from internet and your own portable devices (smartphones, tablets, notebook and Mac).

EZCast APP for Windows phone, developed by WinnerWave, displays documents and multimedia from Internet or your Pads/Smartphones wirelessly in cooperation with EZCast devices.

This setting is a complete ban and overrides other settings For users and groups that you add to the Access list, you have three choices of permissions: Read and Write, Read Only, and Write Only.. To change the permissions of the user and groups for a share point, make sure the window of the share point is open in the File Sharing pane of the Server app.. I've factory reset my phone at least 10 or more times
